SSCP Strengthening Standards Capability Project

Strengthening Standards Capability Project (SSCP)

Capacity development and enhanced local expertise for interoperable health systems across the Indo-Pacific.

WHAT IS SSCP

SSCP is a three-year initiative (2024–2027), co-funded by CSIRO and the Australian Government Department of Foreign Affairs and Trade (DFAT), delivered by the Australian e-Health Research Centre (AEHRC).

Working primarily with the Philippines and Fiji, SSCP helps countries across the Indo-Pacific region to build the capability, local expertise and practical foundations needed to make health information interoperable, and to adopt, implement and sustain interoperability standards such as HL7 FHIR, SNOMED CT, the International Patient Summary and Digital Public Infrastructure for Health, locally.

Lessons, best practices and public goods generated through the country engagements are shared regionally, reflecting a "stronger together" approach to Indo-Pacific health security, health equity and universal health coverage.

CAPACITY DEVELOPMENT FRAMEWORK

LEARN

Competency-based standards training, peer-to-peer mentorship and academic partnerships

BUILD

Shared sandbox for countries to develop operational skills beyond theory and test before they commit.

CONNECT

Community as glue to the sustainable capacity, and communities of practice that outlast the funding cycle

IMPACT SO FAR

1500 +

participants engaged in activities to build skills in Interoperability across the Philippines, Fiji and the wider Indo-Pacific region

~200

members in the Philippines Standards and Interoperability **Community of Practice**

22 +

countries participated in regional activities incl. bootcamps, workshops, and connectathons, from March 2024 - June 2026

2

National Core FHIR IGs are in development to support National FHIR Ecosystems in the Philippines and Fiji

2024–2025

Country Awareness and foundations

2026

Co-Design and localised capacity development

2026–2028

Standards Support and Sustainability

NEXT MILESTONE

Sydney Bootcamp 18–20 October 2026

GET INVOLVED

Connected health systems. Better health outcomes.
